The Academic Review Committee (ARC) is responsible for reviewing the academic credentials of applicants who hold undergraduate (Bachelor-level) engineering degrees that are not recognized by the CEAB. The ARC also reviews all geoscience related degrees.

The ARC met four times between July 1, 2015 and June 30, 2016. During the year 144 new assessment files were reviewed. The ARC reviewed 25 files (8 Engineers and 17 Geoscientists); the Staff Committee reviewed 119 files. Two interviews were conducted for applicants who had been assigned a confirmatory examination and who appeared to have more than ten years of engineering work experience. In total 150 applicants were deemed academically qualified (131 Engineers and 19 Geoscientists).

The assessment of academic qualifications is, by no means, a simple task, and I therefore would like to sincerely thank the ARC members for their participation and service. I also would like to thank Grant Koropatnick, Sharon Sankar, Fiona Hillier, and Claudia Shymko for their outstanding administrative and logistical support to the ARC.
