PLATFORM	<p>As a member of APEGM Council, I will focus my efforts on supporting the existing endeavors currently underway and look to increase the publics' awareness of our respective professions.</p> <p>As a past member of the Association's Public Awareness Committee I understand the importance of promoting our profession. Increased public awareness will lead to several positive outcomes, most important of which is increased enrollment in engineering/geoscience programs and an eventual increase in registration with the Association.</p> <ul style="list-style-type: none"><li>• Bolster existing efforts underway to attract students entering the key transition years (junior high to high school and high school to university). Express the importance of choosing courses and paths that could potentially lead to a career as a professional engineer or geoscientist.</li><li>• Continue our presence at the engineering and geoscience programs of local post-secondary institutions voicing the importance and benefits of registering with the Association upon graduation.</li><li>• Focus efforts on communicating to the public the advantages of hiring licensed professionals. Increase advertising aimed toward the general public by way of media and involvement with difference events across the Province.</li></ul>
