EMPLOYERS SINCE GRADUATION	University of Manitoba, Director, Engineering Access Program - 1998 to present Mnjikaning First Nation, Project Manager - 1996 to 1998 Ogemawahj Tribal Council, Engineer/Project Manager - 1995 to 1996 Terraspec, Engineer-in-Training, Geotechnical Engineer - 1988 to 1995
PLATFORM	I believe the future of the engineering and geoscience professions rests on four pillars:  - better outreach to the general public - being more inclusive - a healthy influx of people into the profession, and - the majority of engineers/geoscientists joining APEGM.

As an APEGM councillor, I will endeavour to:

- Increase awareness of engineering and geoscience careers to youth that may not have had the opportunity to learn of them (Aboriginal youth, youth in northern, rural and isolated communities, and young women).
- Use my position in the Faculty of Engineering at the University of Manitoba to maintain and develop communications with the engineers and geoscientists that work there and the students that study there.
- Develop my close working relationships with the Women in Science and Engineering program (WISE), the University of Manitoba Faculty of Engineering, Internationally Educated Engineering Qualification Program (IEEQ), Aboriginal communities, and numerous corporations to promote the professions of engineering and geoscience.
