

City of Winnipeg Transportation Master Plan

Winnipeg and the Manitoba Capital Region are growing at a pace we have not seen in several decades. By 2031, it is projected that Winnipeg and the surrounding areas will be approaching one million people. With this growth, come the opportunity for more compact and vibrant communities and increased justification of infrastructure renewal and expansion. However this growth also presents a challenge and requires innovative and proactive transportation solutions to support Winnipeg's current and future prosperity in an economically, socially and environmentally sustainable manner.

The Winnipeg Transportation Master Plan is intended to set out a strategic vision for Winnipeg over the next 20 years which is compatible with OurWinnipeg and the six strategic goals established under the Sustainable Transportation Direction Strategy.
