

STRUCTURAL ENGINEER (INTERMEDIATE / SENIOR)

Crosier Kilgour is a consulting engineering firm of unique design, bringing a dynamic and fresh approach to engineering with one of the longest histories of any firm in Manitoba. We've served the construction industry for decades, consistently delivering national-calibre expertise while acting as the primary structural engineering partner for Winnipeg's architectural firms and established ourselves as Manitoba's leading structural engineering consulting firm with a reputation for elegant, cost-effective, and durable solutions.

We're a talented team that thrives on complex and demanding projects.

Finally, we understand that a company is only as good as its people – and our people are great. This is why we confidently invest in our team, their professional growth and in the best technology to help them carry out leading-edge projects and provide innovative solutions to our clients. Our staff also help us to actively give back to our community through ventures such as the Community Helpers Unite Kitchen / N'Dinawemak Warming Shelter, Habitat for Humanity builds (with an all-female crew!) and more.

Currently, we are looking for a **Structural Engineer (Intermediate / Senior)** in response to a growing workload within our structural consulting practice.

Location: Winnipeg

Hours: Daytime hours, Monday to Friday

Job Type: Full-time, permanent, in-office position

Ideal Candidate:

- The successful candidate will have a minimum of 5-10+ years' experience in the design of building structures and components. Assets would include:
 - exposure to design with all materials;
 - experience in computer modelling;
 - excellent written communication skills;
 - experience working within a multidisciplinary consultant team;
 - experience with site investigations / forensic engineering
- This candidate should be registered (or eligible for registration) with EGM.

Key Responsibilities:

- Structural design and management of multiple projects of varying sizes with involvement spanning from schematic design through completion of construction. This would include but not be limited to design, provision of sketches and markups for drafting, and review of drawings to ensure designs meet governing body standards and engineering best practices.

- Structural restoration projects would involve the investigation, assessment, restoration, and protection of existing concrete, masonry, steel, and wood structures
- Building envelope restoration projects include site investigation, design, and contract administration of building and roofing restoration projects
- Collaborate with internal colleagues and external project team members for successful completion of projects
- Develop your work plan in alignment with your team, ensuring you meet targets and stay within budget
- Quantification and recording of structural work/repairs
- Perform site reviews throughout the construction phase
- Prepare construction field reports
- Support the Principal Engineer during initial assessment and design phases
- Senior staff provide coaching, mentoring, and training for junior staff

Compensation:

- Competitive compensation package, including bonuses
- Group Health Benefits
- Pension Matching
- Paid Professional Development and an in-house Lunch and Learn PD series
- Paid Professional Association Dues
- Employee Health and Fitness Spending Allowance
- Employee Assistance Program

Please e-mail your application to careers@crosierkilgour.com. Although we appreciate all applications, only those short-listed will be contacted for an interview.
