

Call for Abstracts

From October 13- 16, 2020, Engineers Geoscientists Manitoba will host its annual conference, *Ingenium*, at the RBC Convention Centre in Winnipeg. *Ingenium* is a premier professional development opportunity for the engineering and geoscience community in Manitoba, with participants representing a cross-section of the 8,200 practitioners who work in the province's private and public sectors.

Ingenium's Professional Development Seminars will take place on October 14 and 15, 2020. The Association welcomes abstracts for presentations and workshops on any topic related to engineering and geoscience and the professionals which practice in those fields.

In particular, we welcome presentations and workshops which explore:

- Case studies of successful applications of new strategies or technology in Manitoba
- Resiliency and climate change
- Technical presentations on emerging technologies
- Industry trends
- Competency skills benefitting engineering and geoscience professionals

Please submit a half-page abstract, outlining the presentation or workshop proposal, along with the presenter's name, contact information, and brief biography to Danielle Wawryk, Communications & Events Coordinator, via email to DWawryk@EngGeoMB.ca. Abstracts must clearly describe the content of the presentation or workshop.

Both Engineers Geoscientists Manitoba members and non-members are invited to submit abstracts.

Deadline for submissions is **Friday, April 24, 2020**.

Final decisions regarding presentations selected for inclusion in the conference will be made by early June.
