

***Engineers Geoscientists Manitoba 2026 AGM - Greetings for Jennifer Quaglietta,
CEO/Registrar, Professional Engineers Ontario***

On behalf of Professional Engineers Ontario (PEO), I would like to extend our best wishes to all our friends and colleagues at Engineers Geoscientists Manitoba. Congratulations on your 2026 AGM, and on another year regulating the engineering and geoscience professions in Manitoba.

Canada's engineering and geoscience regulators share a commitment to protecting the public interest by regulating the practice of professional engineering and geoscience and governing licence holders in our respective provinces. We also share the challenge of navigating our regulatory role amid rapidly evolving technologies, emerging practice disciplines, and increased scrutiny and public expectations for regulators.

Shared cooperation has never been more important. At a time when large-scale projects are vital to Canada's economic health, our mutual efforts to ease practice barriers across the country are a critical step in building the nation. We recently streamlined the Canadian P.Eng mobility application process to ensure a decision is delivered within 10 business days of an application. This will benefit both our organizations, allowing licence holders to travel for work in both provinces with a minimum of delay.

I look forward to hearing about all your achievements this past year and commend you for your leadership in modernizing the *Engineering and Geoscientific Professions Act*. We recently initiated a similar process with our own *Professional Engineers Act*, and look forward to sharing best experiences and practices with you.

I know each of our organizations are positioning themselves to play a vital role in public safety and professional regulation for years to come.

On behalf of all our licence holders at Professional Engineers Ontario, thank you for all you do to keep Manitobans safe. Have a great AGM and a great year!

Sincerely,

Jennifer Quaglietta, P.Eng, MBA, ICD.D

CEO and Registrar, Professional Engineers Ontario
