*Please quote competition number **37370**.*

Reporting to the mill general supervisor, you will be responsible for providing technical expertise to process operations and establishing operational guidelines and control parameters for water treatment and tailings transport, and ensuring regulatory requirements are met. Your responsibilities will include troubleshooting of plant operations, developing and communicating operational set-points, metallurgical accounting, and continuously improving process operations and controls. You will foster innovation within the operations and technical teams and communicate recommendations to improve operations while assisting with coordination of activities, people and resources on projects to meet project objectives, timelines and budget.

Education and Qualifications

Requirements of the position:

- Bachelor's degree in chemical, metallurgical, or mineral process engineering
- A minimum of two years relevant work experience
- Equivalent combination of education and work experience considered
- Proficient and effective communication, research, and interpersonal skills
- Work a rotational schedule and commute to site by aircraft
- You must be eligible for registration with the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS)

Assets:

- Experience in water treatment, or bulk neutralization circuit operation
- Industrial operations experience
- Bench and pilot scale research and reporting
- Experience with PI Asset Framework & PI Vision
- Experience in application and tuning of process control loops, including advanced process controls
- Experience with managing small projects, studies, data analysis, and interpretation
- Proficiency with mass and water balances

Applicants will be considered for a level within the job progression, which is appropriate to their qualifications.

Safety is a top priority at Cameco. Successful candidates for all positions at safety-sensitive sites or in safety-sensitive positions must take and pass a substance test (which includes marijuana testing) as a condition of employment. Marijuana remains in a user's system for about 30 days, so applicants who recently used marijuana recreationally should not expect to pass a substance test.
